

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

During their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could swiftly and securely lift people in the air to accomplish upkeep and other construction services.

After their return from vacation, John set up a partnership with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into existing models.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make certain clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
